## Summary

Meticulous software developer with over 3 years of experience designing, developing, deploying, and maintaining web applications. Skilled in both client- and server-side development. Located in Raleigh, NC.

## Experience

**Web Developer** | RnA ReSet                                          November 2019 - Present

- Operated as the sole developer, creating end-to-end solutions to support all departments including sales, marketing, customer service, and operations.
- Developed a custom inventory application that reduced fulfillment errors, kept sales channels in sync, and provided purchasing recommendations.
- Created data pipelines from various applications into a data warehouse as well as a custom reporting application.
- Customized Shopify and WordPress sites with theme and plugin development to support business objectives.
- Developed a shipping rates API using Pocketbase for Shopify stores to provide custom rates by US postal zone.
- Migrated Shopify Scripts to Shopify Functions, providing a user interface for configuring discounts and shipping rules.
- Developed a WordPress plugin to handle responses from WPForms to create/update records in Salesforce.
